INSTRUCTIONS

Prior to project start, the PV contractor/installer (“Contractor”) reviews the Low Income Weatherization Program (LIWP) job training requirement information in this affidavit. After installation is complete, the contractor submits a completed version which would include the job trainee’s signature and information to the LIWP team.

WORKFORCE TRAINING REQUIREMENTS

In order for a contractor to be eligible to work on a PV project receiving LIWP incentive, the contractor agrees to hire a student(s) or graduate(s) of a job training program¹ and provide Job Training Opportunities (JTO) hours. The training can be completed via direct solar installation or in a support role on the specific LIWP solar project indicated in the Project Address below, including but not limited to project installation, project design, project engineering, or project coordination.

The Contractor is responsible for hiring the job trainee(s) for each LIWP installation and will need to provide the corresponding LIWP Administrator with the names of the eligible job training program and job trainee(s) used for each LIWP installation. A current contractor employee who graduated from an eligible job training program within 12 months of the LIWP installation project and been employed with the installer for 3 months or less would fulfill the workforce partnership requirement to participate as one of the trainees.

For time spent on each LIWP installation, contractor must pay job trainee(s) at a rate consistent with the contractor’s entry level or temporary worker wage.

Contractor’s insurance must cover the employment of the LIWP job trainees, including temporary hires if the job training organization/program does not provide liability coverage for its trainees.

¹ Eligible job training programs include those offered by a California Community College or other PV-training programs offered to the public by local government workforce development programs, community non-profits, private enterprises, or the electrical workers union with 40+ hours of instructional and/or hands-on PV installation and design training.

The JTO hours are set forth in the following table:

System Size (DC-kW)	Job Training Opportunities
0 -10kW	1 JTO and no less than 16 hours
10 kW-<30 kW	2 JTOs and no less than 16 hours each Trainee
30 kW-<100 kW	2 JTOs and no less than 24 hours each Trainee
100+ kW	3 JTOs and no less than 40 hours each Trainee
